PTCE DUMP SHEET

Prescription processing

Prescription origin codes (POC)

POC	Meaning
0	Not known: used only when the way the original prescription was received is unknown
1	Written prescription via paper, including computer-printed prescriptions a physician signs as well as traditional prescription forms
2	Telephonic prescription
3	E-prescription
4	Facsimile prescription obtained via fax transmission
5	Pharmacy: a prescription transferred from another pharmacy, or created by the pharmacy itself (e.g., under a vaccine or naloxone protocol)

Dispense as written (DAW) codes

DAW	Meaning
0	No product selection indicated; default
1	Substitution not allowed by prescriber
2	Substitution allowed — patient-requested product dispensed; used when a patient requests a specific brand
3	Substitution allowed — pharmacist-selected product dispensed; used when the pharmacist determines the brand product should be dispensed
4	Substitution allowed — generic not in stock, so the pharmacist dispenses the brand name drug
5	Substitution allowed — brand drug dispensed as generic

Parts of a prescription label

- Pharmacy name, address, and contact number
- Prescription number
- Name of the prescriber
- Patient name
- Date filled
- Directions for use
- Medication name, quantity, and number of refills
- Auxiliary labels
- Date after which the medication should not be taken
